Mohd Sufiyan

Software Engineer

+91-9628190680 mohdsufiyanmansoori310@gmail.com www.linkedin.com/in/mohd-sufiyan786

Summary

A highly motivated and detail-oriented Software Engineering enthusiast with a strong foundation in programming languages such as Java and Python. Skilled in backend development using Django, with hands-on experience in building scalable and efficient web applications. Proficient in database management using SQL, ensuring optimized data handling and performance.

Skills

Programming: Java, Python
Web Development: HTML, CSS, DJANGO
Database: MySQL, MongoDB
Tools: Git, GitHub, VS Code
Core Concepts: DSA, Problem Solving
Other Skills: Machine Learning, Object Oriented Programming

Experience

Software Engineering Intern (Self project/Academic Project)

- Developed multiple academic and personal projects using Python and Django
- Designed responsive web application using HTML, CSS and django
- Integrated backend APIs for real-time responses
- Strong problem-solving skills and understading of DSA
- Worked with Git and GitHub for version control
- Improved user interaction by implementing AI-based suggestions

Projects

AI Chatbot System | *Python, Flask, Natural Language Processing (NLP)*

- Designed and developed an AI chatbot using Python that automated user interactions and reduced customer support tickets.
- Implemented Natural Language Processing techniques, achieving accuracy in intent recognition for understanding user queries and generating accurate responses.
- Integrated the chatbot with a web interface using Flask framework, supporting XX concurrent users and ensuring a seamless user experience.
- Enhanced chatbot performance by optimizing response accuracy and reducing response time.
- Applied basic machine learning concepts to improve conversation handling and intent recognition.

Data Analysis and Visualization Project (Python, Pandas, NumPy, Matplotlib)

- Performed data cleaning, preprocessing, and analysis on large datasets using Pandas and NumPy.
- Created visualizations such as bar charts, line graphs, and pie charts using Matplotlib.
- Extracted meaningful insights and trends to support data-driven decision-making.
- Improved data accuracy and efficiency by handling missing values and outliers.

E-commerce Web Application (Python, Django, SQLite/MySQL)

- Built a full-stack e-commerce web application using Django framework.
- Implemented user authentication system including login, registration, and session management.
- Developed features like product listing, shopping cart, and order management.
- Integrated backend database to manage products, users, and transactions efficiently.
- Focused on improving user experience by designing a responsive and interactive interface.

Certifications

Python for Data Science and Machine Learning

- Completed comprehensive training in Python programming, data analysis, and machine learning concepts.
- Gained hands-on experience with libraries such as Pandas, NumPy, and Matplotlib.
- Applied data preprocessing, visualization, and basic predictive modeling techniques.

Web Development with Django

- Learned full-stack web development using Django framework.
- Built dynamic web applications with authentication and database integration.
- Understood REST APIs and backend development concepts.

Data Analysis and Visualization

- Gained expertise in data cleaning, preprocessing, and visualization techniques.
- Worked with real-world datasets to extract insights and trends.
- Used tools like Pandas, NumPy, and Matplotlib for analysis.

Education

Bachelorof Technology(B.Tech) in Computer Science and Engineering (Data science) **Graduated: 2027**

SR Institute of Technology and Management,India(Lucknow.UP) *CGPA: 8.2 / 10*
